Escorted Ashes Transportation

About this service for which I only require a set donation to charity for its use

I provide a service in South Devon whereby loved one's ashes are transported in an adapted black or white Range Rover by an experienced driver in formal funeral attire, who also acts as the carrier. Further, the ashes will never leave the sight or control of the driver/carrier.

The ashes in their container are placed on a purpose-built deck fitted to a catafalque, which is draped in purple crushed velvet material. A pale blue or a pale pink crushed velvet drape can be used for the ashes of a baby or an infant if preferred. Framed photographs can be displayed at the bottom of the catafalque, together with other tributes if required, and the area can also be illuminated.

Boxes and urns of any shape and made from any material such as ceramic, glass, cardboard or wood, will be safely and securely held onto the deck using my specially-adapted adjustable bier pins. There will be four bier pins in total holding the box or urn. Only two are shown in each of the above photographs, to act as a visual aid to my secure holding system.

This service can be used in conjunction with my Ashes Scattering by Aerial Launcher service, which has a page on this website, and when used together, there is no charge for this service if it meets the criteria explained on that page.

Like my alternative hearse services, I do not require payment for myself for providing this service. Instead, I ask that a set charitable donation be made to Torbay Bikers for Kids (Registered Charity No: 1200973), which raises money to purchase essential items that will help improve the lives and/or education of children who are disabled or severely ill, living in Torbay and the surrounding area in South Devon. Hundreds of children have been helped by donations given.
